

AMENDMENTS TO THE SPECIFICATION:

Please amend the paragraph that begins on page 3, line 15 and ends on page 3, lines 19 with the following paragraph:

The ~~execution~~ implementation component preferably includes the process maps for the entity to follow to execute the Imaging System, as well as a plurality of process maps that detail how each type of imaged document will be handled when it arrives at a destination. The ~~execution~~ implementation component also preferably provides information on a plurality of paper document formats with which the Imaging System is designed to work.
